CAREER SUMMARY

Full-Stack Remote Software Developer with a passion for coding and creating web applications with intuitive UX, UI effects, and responsive design. I have been extensively involved in developing web applications such as front-end user interface, and back-end database management. I have experience working with remote teams, and advanced proficiencies in HTML, CSS, SASS, JavaScript, Ruby, Ruby on Rail, and React/Redux. With 5 years of experience in the tech field as a Mechatronic Engineer.

WORK EXPERIENCE

- Jr Full-Stack Developer.

Microverse Web Development Program – Remote.

2020

Honed my remote working skills, working remotely over 1000 hours with colleagues from other parts of the world.

Built over 30 projects during the program, showing my learned Front-end and Back-end skills.

Developed my testing skills using RSpec/Capybara on Ruby on Rails and Jest on JavaScript to create unit and integration test. Mentored new students, helping and guiding them through the program. Reviewed and tested their codes and giving feedback to improve it. And helping them to understand some concepts.
